"Delirious persons here a cure may find, To stem the phrensy and to calm the mind."

SECOND IMPRESSION

LONDON
SAMPSON LOW, MARSTON AND CO. LTD.
100, SOUTHWARK STREET, S.E.
INTRODUCTION

The original of this little book was found in the library of a distinguished Essex antiquary: the document has unfortunately no history, but from its appearance and comprehensive character it must have been the still-room book of some manor house or homestead of standing.

The manuscript is a folio composed entirely of vellum, bound in green, with a conventional design in gold: the binding of this book is a reduced facsimile of the original. The writing is in the hand of several persons: the spelling and absence of punctuation are here reproduced in all their original quaintness. The book has been submitted to experts, who are of opinion that it covers a period of some fifty years, terminating about the middle of the eighteenth century.

The condition of many of the rural districts of England in the eighteenth century and the almost impassable state of the roads are brought home to us by a writer in "The Gentleman's Magazine" (1757), in the following description: "It took my horse up to the belly the second step he took on the road, and had I not dismounted and clambered up some bushes I had been lodged there for a season." The isolation of the country in those days is almost incon-
ceivable; the difficulties of travel were immense, and a survival of feudal legislation tied the labourer to the soil. Thus we may look upon the manor or farmhouse, with its retainers, as a detached social unit, and, in a sparsely populated country, almost a state in itself.

It is not difficult to form a picture of the lady of the house: amid her other duties she dispensed doles and charity to the poor around her. Through her knowledge of simples she was also "simpler" of all the ills that flesh is heir to, not only in the case of man, but also of beast. The wisdom and observation of a long procession of forebears are summed up in the recipes gathered in this book.

Herbs, too, she knew, and well of each could speak,
That in her garden sip'd the silvery dew;
Where no vain flower disclo'sd a gaudy freak;
But herbs for use, and physic, not a few,
Of grey renown within those borders grew;
The tufted basil, pun-provoking thyme,
Fresh balm, and mary-gold of cheerful hue;
The lowly gill, that never dares to climb;

And lavender, whose spikes of azure bloom
Shall be ere-while in arid bundles bound
To lurk amidst the labours of her loom,
And crown her kerchiefs clean, with mickle rare perfume.

In these days, when the good manager is scarce, it is perhaps difficult to realize or appreciate that domestic economy was once practised as a science, founded upon the older herbalists, housewives' tales and oral tradition, the whole administered by rule of thumb. As will be seen, the domestic pharmacopoeia had not yet emerged from the seven-
teenth century. The astrological atmosphere of Culpepper, who warns us that he “who would know the operation of the herbs must look up to the stars astrologically,” and the writings of Parkinson, clearly show the influence of that period. The predominance of the healing properties of herbs is still more apparent in this book; there is not a single remedy or simple in which their virtues are not set forth.

In my lady’s garden, set within its red-brick walls, grew Camomile, Basil, Cardons, Angelica, Sweet Chevril, Tanfy, Saffron, Elecampane, Hysop, Thyme, Marjoram, Purfane, Sage, Rosemary, Rue, Pennyroyal, Borage, Liquorice, Horehound and many other plants. With these herbs were cultivated Gillyflower, Panfy, Pinks, Bergamot, Southernwood, Bay, Roses, Jasmine, Lavender and divers sweet-scented plants for the making of simples, perfumes, and “sweete waters.”

The housewife, before entering on her duties, must have served an apprenticeship; doubtless it formed the serious business of her life. How many women nowadays follow the example of their ancestors? The easy access of the doctor, the facilities of communication, the quack remedies obtained from the neighbouring chymist, have superseded the old-fashioned simples.

The old herb garden is a wilderness, and even the names of its occupants have almost passed away. Perchance this little book may help us to picture it at its prime, with all its old-world atmosphere, and haunting memories of much that is still precious. It may also bring back the sweet mingled scent of
the herb garden, the “murmuring of innumerable bees,” the shimmering of the sun on sheltered ples-
ance and well-trimmed hedge of yew, creating an image delightful to recall.

Although many herbals and culinary manuscripts and books date back to a much earlier period, as may be seen in the bibliography, yet they are now scarce and difficult to obtain. This particular example is interesting because of the magic of its herb-lore and the added charm of the making of conserves and perfumes and the preserving of viands. Moreover, it has that personal touch wanting in so many books of a similar nature. One may note the words at the end of some of the simples, “Probatum,” or “Probatum est.” What a world of meaning and satisfaction they imply!

I am indebted to Miss I. L. Gould and Miss B. M. Gould for the long labour and perseverance they have bestowed in deciphering the faded script, and to Mr. J. Manning Watts for his researches into the virtues and properties formerly attributed to these herbs, and for his investigation into the proper spelling of their names, which appear in the manuscript according to the light of nature.

It will be observed that the items in the Index are not always in strict alphabetical order. This will not, however, seriously interfere with reference to any recipe, and it has therefore been thought better to retain them as originally compiled.

H. W. Lewer.

11th August, 1908.
A BOOK OF SIMPLES

1. The Wood-street Cake.

TAKE a quarter of a peck of ye finest flower, mingle into it a little salt & some beaten Cloves Mace & Nutmegs, a pound and halfe of Currance wash'd and dry'd, & a pound of Raisins of ye Sun ston'd and shred, then straine in about a pinte of Ale yeast, and put in ye yolkes of 10 eggs beaten with Rose water, put in a pint of Cream with 3 quarters of a pound of Butter melted in it. mingle all these well together, and knead it, cover it with a clothe and let it stand about an hour before ye fire to rise, then mould it up and beat it out thin in ye edges and thick in ye middle, then prick it or cut it wth a knife, and set it in ye oven, when it is almost bak'd take it out and ice it on ye top wth Rose water & sugar and sett it in ye oven againe 'till 'tis enough, putt some musk or Ambergreefe dissolv'd in ye Rose water.

2. Pectorals for a Coile or Consump'tion.

TAKE one pound of brown Sugar Candy, one Ounce of Juice of Lycorisse, disslove ye lycorisse in 3 spoonfulls of Hyfop water, put to these a drachm of Orrice a drachm of Enul-campane, halfe a drachm of Gum dragon being all made into fine powder, muske a graine then take a drachm of oyle of Anni-seeds, worke it well together with your hand and make it up into pectorals of what bignefs you pleafe, lay them on a dish to dry before ye fire or in an oven after drawn bread, and keep them dry.

boyle and melt your butter in it then temper your cake let it stand half an hour to rise bake it in a paper coffin.

87. To make a very good Cake.

TAKE 6 pound of flower 3 pound of currants 2 pound of reason of the Sun Stoned one pound of almonds blancht and well beaten 20 eggs half the whites one quart of cream 2 pound of butter \( \frac{1}{2} \) a pound of loaf Sugar 2 ounces of mace nutmegs and cinnamon half a pint of Sack beat your almonds with rose water and a quart of ale yeft let your flour be dry’d and currants then put them together with the spices and reasons minc’d Small beat your Sack and eggs and yeft all together let your cream boyle then melt your butter in it and stir it very well together then put your flour in the middle of the Ewer and put the yeft on one side and the cream on the other Side and mix all together very well then put in your almonds and mix them very well together and set it by the fire and when the oven is hot put it into a paper coffin and bake it.

88. To make Marmelade of Oranges.

TAKE of the fairest oranges and pare them very thin and put them into fair water and shift them 3 times a day for 3 days together then boyle them in cloths till they be very soft then take your oranges and cut them small and take out the core and take to a pound of orange one pound of Sugar take a pint of the Fairest pippin water let it be very clear one pound of Sugar more then mix your pippin water to ye 2 pound of Sugar then boyle it and scumme it and put in your cut orange to it and boyle it till it jellies, and squeeze a little lemon into it and put it into glasses.
89. To preserve Pippins.

TAKE a pound of Sugar to a pound of apples and Boyle your Sugar to a Sirrop then pare your apples and cut them in halves and cut out the cores and bruise them and put them into the Sirrop as you do them then put them on a very quick fire and when you see them begin to clear put into it a pint & half of apple jelly and a little renish wine and the juice of 2 or 3 oranges and have some orange peel boyled very tender and cut into long shreds and when you think they are enough put them into your glasses with some orange peel under and at top and Sirrop.

90. To make Small Meade.

TAKE 30 Ale pints of fair water one pound of reasons of the Sun Stoned 4 pints of virgin honey put your honey into the water and Boyle it till the 3d part be boyled away as soon as the Scumme riseth take it off and put in your raisons then let it stand in vessels till it be cold then worke it up with yeast and when it hath wrought in the vessel Stir up the yeast and that together and so tun it up if you please 2 or 3 days after it is tunned draw it out and put it into bottles and after 6 days twill be fit to drink.

91. To make Sugar Cakes.

TAKE 2 pound of flour and one of butter half a pound of Sugar one ounce of carraway Seeds a little mace Shred a little Sack and a little rose water worke these into a paste and make your cakes thin and cut them round with glafs.

92. To make Little Cakes.

TAKE a quarter of a pound of double refined Sugar beat it very fine then about the quantity of rasberrys, strained and then shake in the Sugar by
degrees keeping it beating a hour together and have the white of an egg beaten to froth then put in 4 or 5 drops as you beat the Sugar and rafberries drop them on papers then put them into an oven that is a little warm then put them in your ftove you may do Goofberrys thus but have a care to beat them one way or they will be heavy.

93. To make Cherry Water.

TAKE 4 pound of cherrys 5 pints of claret wine, half a handfull of the tops of rosemery 2 ounces of cinnamon bruised 2 handfulls of balme 2 nutmags sliced Stone the cherrys let them Stand close cover'd in an earthen pot all night then Still it in an ordinary Still and mix it with Sirrop of Gilly flowers 4 ounces of white Sugar candie put into the receiver and let it drop upon it and so keep it for your use keep a quart bottle of the Strongest by itselfe and draw of the rest as long as you like the taste it causeth Sleep tis most excellent for ye passion of the heart, tis a good restorative water twill eafe one out of a Sound.

94. Almond Puddings.

A POUND of Almonds blancht and beat very fine with rose water to such a proportion take 4 penny white loafs grated very fine put it in a bowle and with it 2 pound of beef Suet Shred very Small and mingle it with the bread pour upon it one quart of boyling cream Stir it together and cover it close down and let it stand an hour then put in your almonds and mingle them together and seafon them together with Salt and nutmeg cinnamon & Sugar to your taste 8 eggs leaveing out ye whites mingle them all together you may add a little Sack if you please, if you find your pudding to thick add cream if to thin add grated bread if not fat enough add more Sewit.
95. Quince Cream.

Coddle your quinces scrape them and when they be cold sweeten them. Sweeten your cream and boyle it and when cold put them together.

96. My Lady Ingrams Cream.

Take 2 gallons of new milk 3 pints of cream half a pound of Almonds beaten very fine so put it in and stir it altogether and Set it in a broad pan over the fire when tis ready to boyle take it off and let it stand a day and a night you must sweeten it with Sugar at first then take the glass you mean to put it into you must cut your cream as broad & put the rest in the bottom.

97. To make Pyramid Cream.

First wash one ounce of Icinglafs and lay it 2 days in rosewater then beat a pound of Almonds with a spoonfull of rosewater Strain them with a quart of cream or new milk then put in your Icinglafs and sweeten with Sugar to your taste then boyle it on the fire till a drop will stand then put it in a dish and stir it till tis cold then put it in glasses and put it in a dish you Serve it up in and put cream to be 4 inches above the cream.

98. To make Gimboles.

Take 6 eggs and put away 3 of the whites beat them an hour together with rosewater put to this a quarter of a pint of cream half a pound of Sugar and as much flower as will make it up in a paste as you rowle it into weaks then put in some corriander and caraway Seeds then when you have made them into what faishon you think fit butter your plats & so bake them. let not your oven be to hot to colour them.

TAKE a pound of fine Sugar beaten and searched one pound of flower 4 grains of Amber greafe 3 grains of musk grind them with Sugar mingle them with the flour and Sugar altogether you must dry your flour then take 8 new laid eggs whites and yolks beat them in a stone morter with a wooden peffle for the space of an hour put your Sugar and flour in by little and little till it be all in then beat it for ye space of 2 hours together you must not let it stand still at no time for the good beating makes it white and light then put in 2 spoonfulls of anyfeeds and Stir them together then let your plat be buttered very thin then warm your plats and dish it as fast as you can then have your oven ready not very hot and put them in presently Sifting Sugar over them, when baked enough then take them out & pare ye bottoms of them and lay them upon paper to dry & harden you must take them off ye plats while warme.

100. *Sugar Cakes.*

TAKE 2 pound of flour dried & searched one pound of loaf Sugar dried and Searchd one pound of butter, 6 eggs leaveing out the whites then beat them very well & take a little cream & make it into paste then rowle it & flat it as you will have it & then cut it round wth a glass and bake then in a cool oven you must wash ye butter with a little rose water & see you dry it out.

101. *To make Jelly.*

TAKE 4 calves feet and when they be blanched put them into a pot with a gallon of fair water and let them boyle till they be consumed to half Scumming it as it rifeth very well then Strain it through a coulender into a dish and let it Stand till the next day and through cold Slice it through in
great pieces taking the top and bottom as thin as you can and make of the rest putting it into a clean Skillet then take a pint of Sack or white wine and put to it and the whites of 6 eggs very well beaten to a froth one nutmeg 2 races of ginger both sliced one Sprig of rosemery and a little Salt and half a pound of Sugar and you must Sharpen it with a little lemon and a little vergis if it be fack then set all these in Skillet on a gentle fire Stiring it till tis ready to boyle & let it boyle a quarter of an hour without Stiring and Strain it through a jelly bag of cotton and put a lemon peel into it & let it run through of itself and keep it for your use.

102. To preserve Green Walnuts.

TAKE green walnuts of biggest Size you can get and of the biggest kind about a week after midsummer put them in a bag and boyle them in a great kittle of water till they be tender then peel off ye outward skin that looks black and put into every second a clove put them into somewhat more then the weight of powder Sugar and cover them in the dry Sugar and let them lay a day or 2 then boyle them up 2 or walms on a gentle fire. probatum.

103. To make Cheesecakes.

SET your best milk which is Strokeing and put in as much runnet as you think fit and when tis come brake it not but in a cloth and put it in a vate and set a light press upon it and let it Stand cut your curd in pieces and put it in a mortar and grind and beat your curd put in the quantity of half a pound of butter to as much curd as a little thin cheefe vate will hold when tis well beaten together put in a pound and half of currants and Some cloves and mace and Some rosewater with the eggs you must take 6 yolks and 2 whites and beat them well together with rose-
Take apricocks when the stones are firm in them and to every pound of apricocks a pound of sugar pare them very thin slit them up the same as you pare them put them into cold water else they will lose their colour, being pared put them into a Skillet of cold water and let them on a fire close covered till your water be scalding hot and let them stand till they are pretty cold then set them on the fire again till the water be scalding hot then take them off till the water be Somewhat cold let the water be never more then scalding hot and a little colder after by degrees till they be as green and as tender as you will have them then take them out of the water and lay them in a dish and strew some of your weigh’d sugar on them else they will presently lose their colour then put your Sugar into your preserving pan and to every pound of Sugar take a quarter of a pint of the same water as the apricocks was boiled in then melt your sugar and put in your apricocks and after a little boiling they will stone then put them into the Sirrop again and being boiled a while take them out ye Sirrop and lay them in a broad silver dish and boyle the Sirrop to what height you please if you boyle it too little it will not keep you may if you please put to these a grain or 2 of musk and Amber-grease pour the Sirrop while it is hot on the apricocks so let them stand till ye next day then put them up into glassies.
105. To Preserve Gooseberries.

GATHER the fairest round gooseberries when they are at their full bigness & before they begin to be soft when they are new gather’d cut off the black tops and stone them strewing fine Sugar upon them as you Stone them then to 3 quarters of a pound of stoned gooseberries take a pound of double refined Sugar finely beaten and lay half of it in the bottom of your pan then lay in your gooseberries one by one all over upon the Sugar, then put in ye rest of your Sugar but keep a Spoonfull or more of it to Strew upon it in the boyleing then Stamp a few gooseberries the black being taken off and Strain the juice out of them and of that juice put in 12 Spoonfulls to this proportion drop it out of the Spoon all over the Sugar and gooseberries then set them on a very quick fire to boyle as fast as you can to boyle up to the top of the pan then take them off and shake the pan and strew on some of the Sugar and presently set it on the fire again to boyle up then take it off and shake it and set it on again to boyle fast and when you see the gooseberries look very clear take them off and when they are a little cold put them up in glasses take them up with Sirrop for if you take them without the Sirrop they will not be plump then put them up but let them not be covered till they are cold you must try to see whether the Sirrop will jelly before you put them up.

106. To Preserve Sweet Lemons or Oranges.

TAKE your oranges and pare them very thin and lay them all night in cold water then boyle them half an hour and put them into cold water yn make holes on the top where the stalk growes and take out the seeds as clean as you can and let them lay in that water till the next day then boyle them again almost half an hour then take them up and Set them upon a
double cloth and cover them with a cloth till they be almost cold then weigh them and take to every pound of orange a pound and half of Sugar and to every pound of Sugar a wine pint and half of water boyle your sirrop and strain it and when it is almost cold put in your oranges and boyle them with a soft fire till they look clear and the Sirrop of a good hight about a fortnight or 3 weeks after take your Sirrop from your oranges and boyle it again and when it is cold put your oranges in it and keep it in glassles. ye great red oranges will do best this way.

107. To make Black Puddings.

TO make 3 dozen of puddings take a quarter of a peck of grots and 2 quarts of milk boyle it and then put in your grots and fire them close and let them stand all night and in the morning take 2 hand-fulls of sweet herbs Shred small, and one pint of blood 3 pounds of Suit Shred Small put all these things to your grots and season it with a little cloves & mace one nutmeg pepper & one ounce of annyseeds and Salt 6 eggs whites and all.

108. To make White Puddings.

TO make 3 dozen take a quart of Stired grotts one penny loafe grated 6 eggs yolkes and whites beat with rose water half a pound of Sugar and a pound of currants, half a pint of cream mix all these things with your grots and season it with cinnamon.

109. To make a Poffet.

TAKE a quart of cream and half a nutmeg quarter it then take a stick of cinnamon and a quarter of a pound of Sugar and then set it on the fire and keeping it stirring always one way and let it boyle together a quarter of an hour then take 6 eggs putting away the whit's then beat them very well and put
them into the cream still constantly stirring it and so soon as it boyles take it off the fire and let it coole a little it must cool but a little then take a quarter of a pint of Sack made very hot in a bason then take your cream and stand upon a floole as high as you can & pour your cream into your bason very softly as high as you can pour it right then set it to the fire till it be ready to be eaten this will be all curd & no drink.

110. To make a Sullibub.

To every quart of cream take about 3 quarters of a pint of Sack boyle the cream and make the Sack almost as sweet as a Sirrop then set it on the fire and make it reasonable hot and when the cream is a little cooled with a wooden Spring draw up the cream and so squirt it in till the pot be full if you make it in the morning very early twill be ready to eat yt afternoon. Some boyle a blade of mace in the cream.

111. To make a Snow to put on the Sullibub.

Take a pint of cream and the whites of 4 or 5 eggs and a little rose water Sweeten this with Sugar beat this with a stick which must be cloven in 5 or 6 parts beat it till you find it begin to rise in bubbles with a spoon take off those and lay them in a dish so beat till you have all that will rise yn when your fullibubs is ready to be used lay on the upermost of the snow and heap it high.

112. To make Clouted Cream.

Take the top of your milk after it has stood one hour and make it scalding hot let it not boyle then put it into an earthen pan then leave it half an hour to make it froth as much as you can then set it into the oven as soon as bread is drawn out of it let
it stand in 7 or 8 hours then take it out gently and let it stand at left 24 hours before you use it make a bottom to it with Sweet cream boyle it and boyle large mace with it y° beat the yolks of 2 or 3 eggs with a little rose water then take the cream from the fire and put 2 or 3 Spoonfulls of it to the eggs then Stir them together and put them into a poñet to cream then Set it over the fire & let it boyle one walme then take it oft and sweeten it with Sugar if you should put the eggs into it whilst it is over the fire it will be apt to curdle Stir it all the while it stands on the fire after the eggs are put in when it's Sweeten'd let it stand being Stir'd with a Spoon till it be paste creaming at top when it is cold take off the top of the baked cream with a Skimer and lay it upon the other Scrape Sugar on it and so serve it the baked cream will be near an inch thick if it stand 2 or 3 days.

113. The Red Surfet Water for any Surfet.

TAKE a gallon of the best aquavite a pint of the best damalke rose water a pound of white Sugar candy put all these into a large stone jug to steep a day and a night then put in half a pint of poppy water distilled as you do your rose water with a pound and half of raisons of the Sun Stoned with half a pound of dates the Stones taken out and the white skins, and then slice them very thin then take of mace cinnamon and anyseeds of each an ounce of cloves bruised half an ounce liquorish scraped and sliced a quarter of a pound, your anyseeds must be rubed and dufted then put all these into your aquavite after all these things have steeped 4 days put into it 6 good handfulls of red poppie leaves it is the red single poppies that growes amongst the corn and if the colour be not red enough put in more leaves & after 10 days let it run through a jelly bag and put it into
your glass and stop it very close and put in to your glass to it 2 pounds of your smooth musk caraway comfits, and so keep it for your use, the Spice and Seeds must be bruised if you do not squeeze those things when you strain it you may put it into the jug again with a gallon more of aquavite and half a pint of poppie water and a pound of Sugar candie more. Stir it every day twice or thrice for ten days together and keep it close stoped and then you may mix some of that smaller with the first which was the strongest of all. This water is good for any surfeit what so ever by any accident and they may give 2 or 3 Spoonfulls left at night and if the Surfeit be dangerous give it once in 6 or 8 hours for 3 several times or in necessity oftner.

114. To make French Bread.

TAKE to a peck of flour 2 ounces of salt and a pint or more of very good ale yeast and knead it up as other bread with warm water as light as possible then let it lye half an hour to rise then cut it to the bigness you will have every loaf, which is about ye bigness of a penny loaf and make them up very lightly not moulding it at all and put them into dishes flouring the dishes first with flour and cut off that may be on the top too much then cover them up close again and let them stand and rise again till they have risen their full which you may know by the flour on the top which will begin to be crakling on the top then having your oven ready hot and pretty quick turn them out of the dishes upon a peele flour'd ready and so set them in as fast as you can never pricking or cutting them round, Set the oven led up close but not Stop it approved of your dough must be as light as any cake bread so some flour will require more yeast and water than other this is left to ye bakers discretion.

46
115. To Dry Apricocks.

TAKE a pound of Apricocks 3 quarters of a pound of double refined Sugar pare the apricocks very thin and slit them in the Seame of the apricocks then forth the stones then strew the silver basin or deep dish you boyle them in with the lesser half of the Sugar being finely beaten and searched then set the apricocks in the basin or dish that end downward which grew in the stalk with them. Strew the rest of the Sugar upon them and cover ym and let them stand one night or one day while it be dissolved then let it boyle for one quarter of an hour upon a quick fire before they be half boyled turn them with a spoon when boyled let them stand 2 days in the Sirrop before you take them forth to dip them in the Same then lay them on tin plates in the Sun and turn ym every morning.

116. To make Plumme Gimbols.

TAKE your plummes when full ripe and put them in a porringer and set them over the fire and stir them continually with a Spoon and when they begins to brake and be soft take them out and pick off all their skins stalks and stones very clean when you have done so cell them on the fire again still stirring till such time all the moisture be almost dried up and the plum stuff be pretty stuff then take it off the fire so let it stand till it cold then take double refined Sugar and put to the plumme stuff and take as much Sugar as will make it paste and rowle it and worke it together and let it be as thick as paste then rowle it in works as you do gimbols in what fashion you please you need not oven them they will be dry of themselves.

117. To dry Cherrys Red.

TAKE to 3 pound of cherrys being through ripe and Stoned weigh them and to your 3 pound take a pound of the best hard Sugar beat it and put it into
your preserving pan and put better than half a pint of water to it and with your hand stir it all together then put in your cherrys and Stir them in your water and Sugar and cover them and make them boyle as fast as possibly you can Scumme them and when they be a little soft take them off the fire and pour them Sirrop and all into a gaily pot then cover them and so let them stand 24 hours then pour them into a Sive and let ye Sirrop run from them and then lay them on glass plates as close as you can one by one or upon a clean fine dry them either in the Sun, Stove or oven when one side is pretty dry flat them and turn them and when through dry box them very close and let no air come to them they must be turned twice a day till through dry and on fresh things.

118. To make Bean Cakes.

LAY in water half an hour before you use them half a pound of almonds then blanch and slit them very thin as possibly you may the long way of the almonds then take half a pound of Sugar finely beaten and search'd and mingle with the almonds that are well dry'd from ye water then take the whites of 2 eggs with butter and wet the sugar and almonds wherewith but not to much for they may be soon over wet then take of your fine wafer sheets that are made for bottom and cut out into round cases and so spread your almonds in little ruffles cakes the almonds being set with a bodkin edge long you must mingle also some cardimus or caraway seeds either will do well with Sugar you put them on warm plates set them in a quick oven but not over hot neither must they stay to long for loosing their colour you must beat your eggs with a little rosewater.
The Cabbage Cream.

Take 6 gallons of new milk and let it be ready to Boyle then put in one porringer full of cold cream and stir it well about fill then 18 broad flat pans when tis cold take off the cream and lay it round in a dish like a cabbage and sprinkle a little rose water and a little sugar well beaten and sifted then scald your milk again and put ye same quantity of cream you did before till it be like a little cabbage the last cream that you take off the scalded milk lay plain upon the cabbage but put no cold cream to it then strew some rose water upon it.

To make Paste of Apricocks.

Take apricocks before they be quite ripe and after you have coddled them then pare them let them not be too soft then they will not be so troublesome to pare then beat them very small in a mortar then put them in a dish and set them on a fire never letting them to be any hotter than you can endure your finger at the bottom of the dish never to Boyle for if they should be to hot it would spoil the colour of your pulp and so let them stand on the fire till they be pretty dry which will be till the sugar is boiled up to sugar and that very high to dry sugar again you must take to 4 pound of sugar 4 pound of apricocks after you have coddled stoned and pared them and when it be so take it off and put it into your pulp till it be cold and when it is well mingled then set it on the fire again in a dish or bason that it was in before upon a chaffen dish of coales and not to be any hotter than it was before in the drying before the sugar was in it and then you shall see it will thicken and come to a paste then take your moulds and put in them and so let them stand to dry either in the fun or in a stove and when they be half dry cut them on
ye edges and take your moulds off it must be very thick paste before you put it into your moulds or it will run about do what you can it will run a little. after the same manner you may make paste of coddlingings only when they are coddled peel them and put them in hot water to green if one water will not do put in more till they are green then cover them close till they are green. you must dip your Sugar in water.

121. Angelicoe Cakes.

PUT your angelicoe in hot water and so let it green boyle your Sugar to candie hight chop your angelicoe small and so stir it together drop it into cakes & so put it in a stove.

122. To make a Lemon Cream.

TAKE your best cream and boyle it well and when it is ready take it off put in the yolkes of 2 eggs well beaten and let it have a boyle the Sugar must be bowled in the cream before the eggs be in y=a have in readiness the juice of 2 lemons in a dish and when your cream is pretty cold Stir the juice of lemon and Sugar and keep it well Stiring till tis almost cold then put it into a dish for your use.

123. A Clouted Cream.

TAKE 2 gallons of new milk and put into 5 or 6 pans and let it stand all night and next day upon a charcole fire set the pans gentlely on the fire and as it creams take it off and lay it in your dish and as you lay it in Strew a little fine Sugar and when you have taken all the cream put to it a little cold cream & so use it.

124. To pickle Mushrooms.

GATHER them early in a morning about the bigness of a walnut let them be fresh and red underneath and of one nights growth blanch them of the
outside and pare them within with some part of the stalks if it be tender and then Strew them into a pan of fair water and a small quantity of salt shift them 3 times and then take them out of the water and put them into a skillet with as much fair water as will cover them a little Salt a faggot of herbs and an oynion and when they do begin to boyle before to Scumme it very carefully and put 3 spoonfulls of white wine vinegar and when they are so done Strain them let them stand till they be cold make them a pickle 2 parts white wine it Self and the other part elder vinegar and put them all into a glass or pot and put the pickle to them, with a little long pepper a few cloves one or two nutmegs quarter’d a little mace a little Salt, and be sure to Stop them up very close that no air may enter.

125. To preserve White Quinces whole.

TAKE a handful of the kernells that will jelly and put them in a little Spring water over night then take your quinces that are of a greenish colour and doth cut tender as any apple core it very well with a Scoop and pare it and put it into a Skillet that will hold but one at once take as much double refined Sugar as the weight of the quince and as much water as will cover the quince Set ye fame water and Sugar over the fire keeping it boyling as fast as may be and when you see it to be clear and tender take it up and put it into your glass or pot crushing it flat down with the back of a Spoon then put into the Sirrop 6 spoonfulls of pippin liquor and 2 Spoonfulls of the jelly from the kernells then set it on the fire Stiring it still and when it boyles Scumme it clean and then put in your quinces again and let it boyle 6 walms keeping it still Shaking left it burn so then take it up and put it into your glass again you must be sure to have
Sirrop enough for ever and anone there will rise a coat upon it yt must be taken off and fresh Sirrop put in.

126. To preserve Goosberries.

Take as much double refined sugar as ye goosberries weigh unpickled and unstoned and to a pound of Sugar take half a pint of water and when your goosberries are clean pickt and stoned set your Sugar and water over the fire and make your Sirrop and when it is clean scummed put in your goosberries and let them boyle as fast as possibily you can till they clear and the sirrop thick enough which will be in les than a quarter of an hour.

127. To make Jelly.

Take a nuckell of veal cut off the fat and skin 2 calves feet very white lay the veal and feet in warm water to soak out the blood shift it into fresh water till all the blood be out then set it to boyle in 3 gallons of Spring water boyleing it continually till it come to a pottle or 3 pints then if you will have it white put in a pint of white wine, if red put in red wine, and boyle it a quarter of an hour then take it and strain it and when tis cold take off all the fat and leave the drofs in the bottom and to every quart of clear broth take cinnamon and nutmegs of each an ounce half an ounce of ginger sliced break your cinnamon in pieces and quarter your nutmegs, then take 2 spoonfulls of corriander seed half a pound of Sugar 6 Spoonfulls of rofewater put all these into a new pipkine wth the whites of 8 new laid eggs well beaten stir all these very well together and set them over boyling them a quarter of an hour & stiring them all the while then pour it into your bagg with 2 handfulls of rosemary in the bottom of ye bagg run it through ye bag twice or thrice.
128. To preserve Raspberries.

TAKE the juice of raspberries and make your Sirrop of it to a pound of raspberries take a pound of sugar and put half the Sugar to ye juice and let it boyle, the put in the raspberries and let them boyle as fast as they can take them off and Shake them oft put in y'n then rest of the Sugar by degrees as they boyle but touch them not, when they are enough the stones will look clear. So you may do currants or cherries.

129. To preserve Oranges.

LAY your oranges in water all night then pare off the rine as thin as may be then make a round hole that your finger may go in and take out all the seeds and set them on the fire & let them boyle half an hour or better then take them out and put them into cold water till the next morning then looke that all the seeds be out and boyle them in a fresh water as before and lay them in cold water again & the next morning boyle them till they be very tender that a small bennet will go through them, then set them with the holes downward on a clean cloth to drain 3 or 4 times double then to every pound of orange take a pound and half of Sugar and to every pound of Sugar a pint of water make your Sirrop and clear it and strain it then put in your oranges letting them boyle moderately till they be clear, turning them often, then take them up and when they be cold put them into a gallypot or glafs & when they have lain a fortnight in the Sirrop take them up & boyle the Sirrop again.

130. To juice Pigg.

CUT your pigg into 4 collers of a Side take 12 cloves 4 leaves of large mace 2 nutmegs Shred thin ftrew all these on the collers with a little salt.
rowle them up hard and bind them close and Boyle them 4 hours and when tis almost boysled put in a faggot of sweet herbs and half a pint of vinegar.

131. To preserve Apricocks.

TAKE a pound of Sugar and a pound of apricocks Stone them and pare them very thin let the Sugar be beaten very fine lay the apricocks in 3 parts of the Sugar all night the next morning Boyle them in their own Sirrop and when you have Scummed them cast in the rest of the Sugar in the boyling & when they are enough and Scummed put in your ambergrease & take y'm up.

132. A Sweet Bag.

TAKE half a pound of benjamin and half a pound of Storacks half a pound of orris an ounce of cloves and a few orange peels dried a little sweet marjerrum dried beat all these pretty gross and take half a bushel of damask roses, and a gentle fire under a Still fill the Still w'th roses just damp them then take them out and put them into a large dish and pull them all to pieces while they be hot Strew these powders being mixt on the roses work all these together so that the powder may stick on the roses do thus till all the roses be done then take a great preserveing glass or 2 that will more than hold it and lay in a lay of roses and strew in some powder so do till all be in the glassses then bind it up close with a double white paper and leather on the top then set it as hot as you can in the Sun every day Shake the glassses very well if you find it do cake in the middle put your hand in the glassses and stir it very well and when tis very dry put some amber grease pounded & some civet rub it about the leaves what quantity you please so you may keep it in bags as long as you please.

54
133. To coller Beef.

323. Mrs Daniells Rea to make White Metheglin.

To every 3 gallons of water put one gallon of honey feeth the same on a moderate fire till the third part be consumed scumming it clear stirring it with a Scummer now and then to raise the honey from the bottom wn its sodden enough it will be clear in boyling by which you may know it is boilied suficiently then put it into a sweet vessel to every 3 gallons so boyl’d and clear’d put one quart of good ale barme the next day draw ye same liquor into another vessel leaving the grounds in the bottom & then put new barme the same quantity after it’s again thus purified and so let it rest in the vessel putting in your bag of spices. The Lady Downs adds Sweet marjerom, rosemery pennyroyall, violets, sweet bryer tops, fennell balme tops lavender tops and time the beth of seeds corriander carraway and anyseeds, of spices ginger nutmogs cloves and mace the spices and seeds to hang in a bag in the barrell, these herbs and spices to the quantity of 8 gallons half an ounce or better of each. But with this addition twill not be so white.

324. Another of Hers to make White Metheglin.

To 12 gallons of water you must take rosemary half a handful broad time, sweet marjerrom, egreemony, harts tongue burrage buglace of each one handful of violet flowers 2 handfuls of jillie flowers one handful anyseeds corriander carraway parsley seeds of each one ounce well bruised wch with the seeds boyle the herbs in the water till it comes to 10 gallons then strain it out and let it coole a little put in your honey good hive honey and stir it together adding so much liquor as will bear an egg to the breadth of 6 pence then take the liquor and put it over ye fire and boyle it a little but scumme it very well, then make it cold and put a little fresh ale barme
into it then put it into a barrel & when it hath done working put in a little bag of such spices as you please with a small quantity of musk.

325. To make a Silliebube.

TAKE a pint of white wine a pint of mornings cream and a quarter of a pound of Sugar and put them in a bason and beat them well together till it come to a froth then pour it into a Syllabub pot and milk a sufficient quantity of milk upon it and let it stand in a cool place till night for the longer it stand so it grow not four the clearer the drink will be and the firmer ye curd.

326. To make a Posset without Milk.

TAKE a pint of Sack and as much ale and put them into that you will make your posset in and in a skillet of water set your pot with the ale and wine till they boyle then season them with Sugar and other spices then take the whites of 16 eggs and the yolkes of 2 or 3 and beat them till they be as thin as water and when your Sack and ale doth boyle pour your eggs upon it as you would do milk stirring it that while with a spoon.

327. To make Sugar Puffs.

TAKE half a pound of the finest sugar beat and search it as fine as you can then put it in a stone alabaster mortar then take the whites of 4 eggs beat them to a froth and put it to your Sugar and beat it with your Sugar as white as you can and as fine as may be then put as much civet as a pins head and as much musk then butter your plates & wipe then afterward lay them in workes bake them in an oven after the bread is drawn or pyes you may put seeds if you please.
328. The Lady Jenkinsons Plumme Cake.

TAKE a peck of fine wheat flour 3 pound of butter breake your butter in pieces into the flour till it be crumbly and then take 8 pound of ye best currants and put them in with a quarter of an ounce of mace & one ounce and half of nutmegs a pound and half of loafe Sugar a spoonfull of salt and an ale pint of Scaulded cream and a pint of cream cold something better than a quarter of a pint of sack 6 eggs both yolkes and whites a pint of new ale barme train'd, mingle all these together but do not knead it longer than to mingle it, then set it before the fire to rise, which will be in half an hour, it must be cover'd with a blanket, when you rowle it out you may if you will put a sheet of other paste under it the oven must be well and hot and it must stand in the oven at least 3 hours when it is almost baked you may draw it to the mouth of the oven and see it as you do tarts.

329. To make Light Bread the French Way.

TAKE half a peck of fine dress'd flour and a pint and half of the best ale barme & as much fair water made hot not to Scauld ye barme but hotter than to endure your hand in it then put your barme to it and season it with a small handfull of salt then make your dough with it & knead it well together & as fast as you can make it into 16 small balls & spread a woollen cloth to lay your loaves on & cover them with ye fame on board lay them one by one not to touch then put them in the oven when you go about your dough you must not let it stand to long but there is no directions to be given when to draw, but you must draw it as you see Cause.
330. The Lady Buttons Almond Butter.

TAKE the best Jourdan almonds and blanch them beating them very small with sweet cream and strain it out and put in as much Sugar as will sweeten it beat your almonds after the first straining 3 or 4 times then set it over a gentle fire till it is pretty thick then put it in a cloth to whey So let it hang all night to drain then turn it into dishes.

331. The Lady Bidollyps Rasberry Wine.

TAKE to every gallon of white wine 2 quarts of rasberryes bruife them then put them and your wine into a stone pot and add to every gallon of wine a quarter of a pound of sugar so cover it close and let it stand steeping 5 days stirring it once every day then take an hipocras bag & wet it with milk and so run your wine through it several times till it run clear then draw it off into bottles and let it stand 3 week with the corkes but slightly put in then put into each bottle a knob of sugar and stop up your bottles then very close & tye down ye corke & set them in a coole place and it will keep a great while.

332. The Lady Ashfields Metbeglin.

TAKE fair water and the best honey beat them well together but not in a wooden vessel for wood drinks up your honey put it together in a kittle and trye it with a new laid egg which will swim at top if it be very strong but if it bob up and sinke it will be to weake and you must add more honey one quarter of honey to a gallon of water will make it very strong then Boyle it an hour and put in to it a bundle of herbs what sort you like best a little bag of spices of nutmegs, ginger, cloves and mace and cinnamon Scumme it well all the while it boyles when it hath boyled a full hour take it off and put it
into earthen pans and so let it stand till the next day pour out all the clear of it into a good vessel that hath had sack or white wine in it let your bag of spices hang in it and so let it be very close stop'd & well filled and let it stand a month longer then if you desire to drink it quickly you may bottle it up if it be strong of the honey you may keep it a year or 2, but if weaker than the proportions above written then it will be ready in 3 months to be spent rosemary time & sweet marjeron are ye herbs should go into it a sprig or 2 of each.

333. The Marleborow Cake.

TAKE a peck of fine flour to it 4 pound of currants 4 pound of butter of cloves mace nutmegs caraway (or corriander) of each a quarter an ounce but most of mace a pound of sugar a pennyworth of Saffron Sack and rofewater ale yeft something less than a pint so make them up into cakes about 2 inches thick prick them wth a bodkin and bake them for your use.

334. To make ye Spanish Cream.

TAKE 5 quarts of milk warm from the cow and when it's boyl'd up to ye top of the Skillet have a quart of cream ready and put it into the milk and stir it well about while on the fire then take it off and put it in 3 or 4 Sallet dishes and let it stand in a coole place that day and a night ye next day take ye cream clean off and put it in a deep gally pot and put as much Sugar as will sweeten it and with a spoon beat it till it be as thick as cream in a churn when it is ready to break and then put it in a dish in what fashion you please with raw cream with it or rather about it.
335. *A Cabbage Cream.*

TAKE fresh milk and scald it and while very hot put it in several pans and let it stand till there be a yellow scumme upon it then cut the scumme in ye middle then take it off the milk and lay it on a faucer which put in your dish you will serve it in with the bottom of the faucer upward when the faucer is all cover'd with the cream search some fine sugar through a tiffany upon it and sprinkle some rose or orange flower water upon it then take the same milk and do as you did before so make your cabbage as big as you will.

TAKE 12 lemons and 12 oranges pare them as you pare an apple neither to thick nor to thin then pinch out the juice out of your peels into sugar next strain out the juice of your oranges and lemons into a pound of powder Sugar then mingle all your juices together and let them stand all night then the next day add another pound of sugar and let it stand till it dissolves then bottle it up for your use keeping it coole and perfumeing it to your likeing.

337. *To keep Damsons all the Year.*

TAKE 3 pounds of the fairest Damsons off the tree and wipe them and pick them with a few holes and lay them one by one in earthen dishes and after ye bread is drawn set them in the oven but not to hot let them stand a day to coole after they are drawn then take a pound of sugar to 3 pounds of Damsons and lay a thin paste in the bottom of a Skillet and lay your damsons close one by one the rest strew between and over your damsons to cover them so put them hot into your pot and the liquor hot also to them so let them stand till through cold
then clarifie butter and put on them not to hot and so let it coole then cover it close and keep it for your use all the year & when you take of them to use and breake your butter you must keep the same butter to cover the remainder till all the damfons be spent. Probatum.

338. Oyster Porrage.

TAKE a barrell of oyfters and in opening them save all the liquor with them put a quart of white wine and a little mace a whole onion and 5 anchovise set them over a gentle fire and let them stew till you conceive them ready then take the yolkes of 16 eggs well beaten together and so put them into your oyfters stirring it constantly to keep your eggs from curdling and when you find them enough stew'd take it off the fire putting into it half a pound of sweet butter and rub the bottom of your dish with garlice or shellot and serve them up with fipputs round the sides of your dish.

339. To make Pancakes.

TAKE 8 eggs whites and all beat them very well and put to them a quart of cream and as much flour as is needfull then take a pound of frefh butter and melt it and throw into your batter and a nutmeg grat'd and so fry them without any other butter in the pan your batter must be made an hour or 2 before you frye it up eat them with juice of orange and Sugar.

340. The Lady Seymours way to Colle Beef.

TAKE a flanke of the youngest beef you can get and cut it into 3 pieces & put it into a paille of plump water and put 2 quarts of falt peeter to it and so let it lay 4 days then take it out and take nutmegg cloves and mace a reasonable quantity and a little
pepper beat altogether then take a handful of sage and half as much young bay leaves shred very small and mingle ye spices and them together and strew them between every laying of beef and so rowle it up in collers very close and keep fast with skewers as you tie it up then put in a pot with 3 pints of claret wine and a gallon of strong broth of mutton or fresh beeke before you lay your coller beeke in water take off the scumme in the inside and when you put the collers in the pot cover it with the scumme then lay the over scumme 3 pounds of beeke sewit the pot must be very close past'd up and set in the oven with brown bread & stand 10 hours then take it out of the pot from the liquor and keep them dry for your eating.

341. To boyle a Rump, Surloine, or Rearing of Beef.

FIRST corne it well with salt 44 hours at the left or 48 if the time will permit then take of the marrow of the beef or the beeke sewit the length of your finger then take sweet herbs as marjerom, winter favorie, pennyroyall, and some time mince them small with your fat or marrow & so stuff it in 4 or 5 rowes all over your beef boyle it with 4 or 5 onions whole then put in pepper and ginger very small beaten only as much as will give it a taste when all these are half boyled put into the broth half a collener of any wholesome sweet herbs grossly cut put into the broth a little vinegar when it is throughly boyled serve it up wth good store of white fippets in your dish pour your broth and herbs upon the beef before you boyle ye beef wash off the salt and cut off the fat very well otherwise ye broth will be too fat and too salt and when your onions are boyled enough take y'n out also for they are only to give a taste but not to be seen or served in.
To preserve Oranges or Lemons.

Take oranges or lemons large and well colour’d and with a little grater grate off the very outsides and deep colour then lay them in water 3 or 4 days then boyle them very tender shifting your water 3 times but let your water be hot which you shift them with in boyling to take away their bitterness from them and when they be very tender then take them out into some earthen dish and with a penknife cut a little hole in the top and take out all the kernells, then take to every pound of oranges a pound and half of good loaf sugar and to every pound of sugar half a pint of fair water and breake your sugar and mix it with your quantity off water and boyle it to a pretty sirrop then take it off the fire and when it is between hot and cold put in your oranges and let them simmer a little but not boyle to fast, for fast boyling will make them hard and tough then put orange and sirrop together in a pot and let them stand 3 days then take out the oranges again and put some more sugar into the sirrop & boyle it something thicker and scumme it clean and when it is almoft cold put in your oranges again and then set them on a soft fire as before letting them only simmer half an hour and then put them up for 3 days more and the 3rd or 4th day do likewise as before to take out the oranges again and let ym simmer another half hour then take them off the fire and put your oranges first in your pot you will keep them in then pour the sirrop on them and let them stand till they be cold then tie them up to keep.

To preserve Pippins Green.

Take pippins when small and green off the tree pare a few and slice them and boyle them in a quart of fair water till they be pap then drain them
through a cloth into a basin of earth then put the liquor into a skillet with a pound of clarified Sugar and put as many green pippins unpared as that liquor will cover and so let them Boyle softly and when you see them boiled as tender as a colding then take them off and peel them the uppermost white skin and then put them in your Sirrop again & Boyle them till the Sirrop be thick and your pippins will be green and you must pot and keep your pot near ye fire. Probatum.

344. To preserve Cherries.

TAKE 6 pound of fair cherries and 7 pound of double refined Sugar then take a pound of cherries and pick off the stalks and bruise them into a gallopot and set it in a skillet of water and Boyle a good while putting a little water to get out all their juice the whilst they are infusing stone your raw cherries and as you stone them put them into some of your sugar finely beaten which will keep them from turning black and when you havestoned all of them laying them in a preserving pan strewn on your cherries a third part of your Sugar and then pour on your strain'd liquor of your other cherries to the raw cherries in your preserving pan and set it on a charcole fire and so let it Boyle very leasurely taking off the scumme as it rises and very often shake them and stir them up from the bottom taking them off the fire sometimes to scumme them clean and let them Boyle a pretty while then put in the other part of your Sugar and let them Boyle very high to clear them & when they be Boyled enough just as you be going to take them off fire take a lemon and cut it in the middle and take out the seeds and squeeze out ye juice into the cherries all over them then take them off the fire and take a sheet of cap paper and lay all over the cherries to take off ye remaining scumme very clean then take out the
cherries leaving them in your firrop to cleanse them from the scumme then when the firrop is also cleaned of scumme pour it to your cherries in your pot and when they are throughly cold tie them up in your pot sometimes opening & stirring them will keep them from candieing & they will keep the better.

345. *The Carraway Comfit Cake without Fruit in it.*

TAKE 2 pound of fine flour 3 quarters of a pound of fresh butter a pound of Sugar both these put into the flour dry (the butter in many small pieces) 7 yolkes and but 3 eggs more which put into the 7 with their whites also and beat them very well together with 4 spoonfulls of Sack and as much rosewater first steeping in the Sack and rosewater 6 pennyworth of saffron some nutmogs grated then take half a pint of cream boyled and cool'd again then take a pint and quarter of very good ale yeast and mingle it with the cream eggs and spices fack and rosewater, warming it altogether milk warm keeping it stirring while you warm it & when warm pour it into your flour, covering it over lightly with the flour & so let it stand a quarter of an hour close cover'd then mingle it all very well together and add thereto a pound and a half of carraway comfits with when all very well mix'd put into a paper hoop & set it in an oven prepared for it 3 quarters of an hour for if it stand to long it will run abroad & be heavy.

346. *The Lady Marqueff of Worcester's Receipt to Jugar all Sorts of Sharpe Fruits or Herbs to dry or Flowers.*

TAKE the whites of eggs and beat them to a froth and when the froth is high dip your fruits herbs or flowers and have some fine sugar double searched and while they are wet with the froth dip in your
herbs fruits or flowers into your sugar your fruit must be spent but your herbs and flowers will keep all the year.

347. To preserve Chyna Oranges.

TAKE what quantity you please of chyna oranges and with a smaller grater grate off the yellow peel (the deepest and ripest oranges do best and clearest) let your grater be very clean else it will change the colour, and take great care you grate not to deep and as you grate them put them in water or they will turn blackish and when you have done them all wash them in 2 or 3 waters and have a kettle of clear water to set them over the fire for a quarter of an hour let them boyle in this first water then have another kettle of water boiling and shift them into it so shifting them into fresh kettles of boiling waters 5 or 6 times so boiling them till they be so tender as a straw may go through them then take them and with a penknife cut out a round piece in the bottom and keep it to go in again, after you have first taken out all the seeds very clean with your little finger and preserved them and are going to pot them up then only you must put in the piece you cut out as a Stople to them you must weigh them when they are boiled and to every pound of orange you must take 2 pound and a half of double refined sugar and to every pound of sugar you may put almost half a pint of fair water, divide your sugar into 3 parts then take one part and put into all the quantity of water stir it together in a great Skellet and set it on the fire and let it boyle a little and Scumme it clear then take it off the fire and let it be pretty coole then put in your oranges and set them on a soft fire and let them not boyle but simmer a little while then take them off the fire putting your oranges 1st into a pot and then pour on the sirrop to them and let them stand 3 days then take the oranges
from the sirrop and put your sirrop into a skellet and put the second part of the sugar and pare and core and quarter 6 John apples and put them into your sirrop and set it on the fire leting it boyle quick till it be much thicker than it was before when you think it thick enough take it off ye fire and let it be almost cold then put in ye oranges again and set them on ye fire and let them simber half an hour as before turning them often (or they will not be all over of one colour) then take them off the fire and pot them up as before to stand 3 days more, and at the 3d days end take out the oranges and put in ye 3d part of your sugar into the sirrop and 6 more John apples ordered as before in with the sirrop and boyle it very thick then take it off and let it acooling as before then put in the oranges and give them one boyling up or 2 but have a care in boyling they do not Harden but take them off the fire and when they are quite cold tye them up in your pot very close to keep for your spending remember to take out the apples before you put in your oranges or that they be so tender as to make the sirrop. Probatum.

348. A Cake for Ordinary Uses.

TAKE 4 pound of fine flour warm it in an earthen pan by the fire then break in a pound of fresh butter and a pound of sugar mixing both very well into ye dryed flour then take 10 eggs put in but 3 of the whites and beat them very well then put to your eggs when well beaten 3 spoonfulls of rosewater and a quarter of a pint of sack a quart of good ale yest more yest if not very good a pint of cream boyled and cooled again some salt a nutmeg grated and some cloves & mace beaten also small mixing all very well together and warm it milk warm & so pour it to your flour very well covering it up warm for a quarter of an hour then put in a pound of raisons of the Sun stoned and
cut small 3 pound of currants clean washt rubbed and dryed all which mixt very well together and put it into a paper hoop and set it in a oven as hot as for small bread and let it stand one hour and a quarter which will be long enough.

349. *Madame Brewen’s French Way to make ye Runnet or Trifle Cream.*

TAKE the blossomes of hortiechokes when they blow and keep them dry all ye year for your use as you do other flowers and when you would make this cream put a few of these blossomes in about a spoonfull of flowers to a pint of cream or new milk and it will turn it as well as runnet and give a more pleasant flavour.

350. *Cowflips into Plummes to make Wine.*

INSTEAD of cowflips take Plummes and slit them and put them into a vessel with a tap in it then take as many gallons of water to your Damfens as you please & to every gallon of water a pound of Powder Sugar and Boyle it till it be clear of ye Scumme then pour it on your Damfens into your vessel boyling hot first putting in with your Plummes some raisons of the Sun Stoned so stop it up 5 or 6 days then draw it off through a strainer and when the vessel is clean pour it in again when it’s strain’d and set it to working with a toast spred with ale yeft and let it worke and after working let it stand 4 or 5 days a clearing then draw it into bottles and put a raison of the Sun Ston’d and a nob of Sugar in each bottle & stop it loofly 2 or 3 days else they will fly but afterwards stop your bottles as fast as you can and set them very coole. *Probatum est By ye Lady Seymour.*
351. My Lady Seymours Pancake.

Take 12 yolks of eggs 2 large nutmegs grated a little Salt to season it and 4 full spoonful of Sugar beat these together halfe an hour then stir in as much fine flour as will stiffen it as soft as a pudding then add to all these a quarter of a pint of Sack & beat it in till it be well mix'd then beat in cream a little and little till it comes to a thin batter so fry them up with a quick fire either with beef lard or fresh butter make your pans first hot with ordinary batter which will make your best fry the better, it is ye best way to make them eat short and light not to make your batter before you are ready to fry them up.

352. My Lady Ffofiers Metheglin.

Take so much clear honey in cold spring water it must be such water as will bear soap well and mingle your water and honey till it will bear an egg when your honey is dissolved in your water cold then put it in a kettle and Boyle it 2 hours still scumming it while any scumme will rise then put it into coolers and when coole as wort to every 12 gallons of liquor put a large quarter of a pint of ale yeft then barrel it up filling your vessel not full about 3 fingers breadth of ye bung hole and hang in your barrell an ounce and half of nutmegs grossly beaten in a bag with a bullet or the like to keep your spice low in your barrell so stop it up and at the years end drink of it and when you draw of it you may bottle it if you please the older it is the better but your vessel must be stop'd very close all the time you keep it and Drink not of it till 12 months old. Probatum est by ye Lady Downs.

353. A Metheglin to be made at Barthollemew Tide.

Take 8 gallons of the best fair water that is not harsh for the better the water the better your liquor will be then take corriander seeds carraways &
any seeds of each half a spoonfull 2 or 3 large maces and also agreemoney sweet marjorom broad time, sweet brier tops pennyroyal of each a quarter of a handful a few double violet flowers and a branch or 2 of rosemary boyle all these together in the water half an hour then strain it through a ranger then set it a cooling till it be almost cold then pour it from the bottom and put so much honey to it as will make it so strong as to carry an egg that nothing may be seen of it but the breadth of a 6 pence then boyle it again and let it boyle till you have scummed it clean then set it abroad as you do wort to coole and put a pint of ale barm to it when you tun it into the barrell put into a bag sliced ginger nutmegs cloves mace and cinnamon and likewise a stone to weigh down the bag and tye a string to it and nail it to ye barrell that it may hang in the middle and when it hath done purging mingle half a grain of musk into a spoonfull of the liquor and put it into the barrell and stop it up very close it will keep long and be very good to ye laft ye receipt is to put the barme to it in the barrell but by experience it is found the best way to put the barm to it before you tun it and set it to working in a little cooler it being cover'd close and so kept cover'd close till the barme begin to flat wch will be 3 or 4 days & then tun it into the barrell & if it worke again stop it not till it hath done working.

354. To preserve Grapes for all the Year.

TAKE fair clusters of grapes and lay them in a platter then cast sugar on them & so put them into a hot oven now and then pouring the liquor from them then turn them and cast more sugar on them as before then take that liquid substance and make a sirrop of it and when your sirrop is cold put in your grapes & so keep them all the year.
355. A Marrow Pudding.

TAKE the marrow out of the bones and after Boyle the bones and take of the fat that riseth in the boyling then take the fat of the sheeps guts and shręd it very small then mingle it with manchet crums being grat’d and nutmegs cloves mace and some Sugar (musk if you please) and a few currants but you must first Plump your currants because all the other ingredients require but little boyling add some rose-water to your spieces and sugar these puddings must not be cut in eating but suckt out otherwise the marrow will run out which is all their goodness.

356. To Candie Irringoe Roots.

TAKE your roots new gather’d without joints or knots Boyle them tender in fair water but let your water first Boyle before you put them in then peel them and slit them and wash them in 2 or 3 waters dry them with a cloth then take twice as much sugar and when your sugar is refin’d Boyle them in one half till they be tender and clear and make a firrop of the other half to the hight of manus Christi that is till it will draw off as fine as a hair then put in your roots again and Boyle them and when you find them enough take them up and shake them in a bason till they be pretty dry after lay them on papers till they be quite dry.

357. To make a Sweetmeat like Rashers of Bacon.

TAKE some of your marshpane pastel rowle it in sanders till it be red then rowle abroad 3 rowles of the red and 4 of the white and so lay a white and red & when all is so lay’d cut them a thwart in thin slices and dry them & it will be like.
358. To Preserve Oranges in Jelly.

TAKE thick rind oranges pare or grate them very thin lay them in water 3 or 4 days then boyle them tender in fair water then take them out and put them into a pan of cold water all night next day dry them with a cloth put them into so much clarified Sugar as will cover them so let them boyle soberly clofe cover'd now and then turning them then let them stand in an earthen pann all night the next day set them on the fire again & when you see them look clear & tender then pour them into a Sive and let your sirrop drain from them then put a quart of apple water into that sirrop and a pound of fresh Sugar & that will make your oranges lay in quaking jelly when it boyled with the other sirrop.

359. Mathew Cariers Ollio or Pottage.

TAKE 13 pound of beef sliced small and boyle out the gravie of it then strain it and stew in that broth 6 sweet breads 12 Squobe pigeons 6 pair of Lamb stones 6 sheeps tongues and pallets, 8 marrow bones the bones boyle with your beef before you strain it and then take them out and serve them in ye broth with the forementioned ingredients in your strain'd broth and seafon it with convenient Salt and Sweet Spices and put manchet cut grossly in it and raw cucumber iff in seafon or a few green pease or the like and so stew altogether & then serve it in hot as possibile & be sure to have broth enough therefore rather more than lefs beef.

360. To make Sugar Jumballs.

TAKE the beft sort of gume dragon the weight of 6 pence steep it in a good spoonfull of rose or orange flower water then beat an egg to froth and let it stand to settle put the juice of a fair lemon into it and when it hath stood a while strain it out clear
then take a quarter of a pound of double refined Sugar well sifted put it into a marble morter with some ambergreefe prepared then put in your gum and a little spoonfull of the pure froth of the egg so grind it altogether now and then putting in a spoonfull of sugar which you must keep out, if it grow dry in ye doing put in a drop or 2 of juice of Lemon in a quarter of an hour they will beat easie sift some sugar on a paper take out the stuff which must be as thick as pap rowle it with your fingers into what form you please but first sift Sugar on your paper you bake them on and set them in the oven when white bread comes forth when they rise they are enough and when you take them off the papers and your oven cooled set them in again one night.

361. To make Gooseberry Wine.

TAKE a skillet with a quart or 3 pints of goosberries full ripe to a quart of Spring water set them on a soft fire and let them stand till the water taste sharpe of ye goosberries but let them not break to pieces for that will make your liquor thick then strain it and boyle it again half as clear then set it in an earthen pan leting it stand till the next day then bottle it up with 3 ounces of Sugar to each bottle. TAKE one good handfull of pine tree tops & bruise them and infuse y"m in one quart of white wine or renish 3 or 4 hours then take one good handfull of dandilyon Boyle it in one quart of new milk make it into a posset with the wine take off the curd pour the drink scoulding hot upon brooklimes, water cressles, sea scurvy gras garden scurvy gras of each a large handfull with the rine of a lemon cover it & drink every morning & afternoon a quarter of a pint sweeten in with Sirrop made of oringe juice & wormwood cold still'd water—drink this ale april and september.

525. To make the Convulsion Water.

TAKE 2 quarts of Spring water and put therein half a handfull of bittony and as much plantin and Spermint & whore hound a quarter of a handfull of centry and as much cardus half a handfull of single pioney roots green & half a handfull of burdock roots green & both sliced very thin half an ounce of hart's horne & half an ounce of sweet fennell feed bruised a little a quarter of an ounce of bastorium and a quarter of an ounce Assifetita stop all these very close in a stone jugg and set it in a kettle of seething water up to the neck of the jugg & let it stand seething 8 hours then take it out and let it stand close stop till next day then put it out into a brass pot and add to it a quart of cardus water and a quart of spermint water half a pint of red rose water & half a pint of old malligo Sack then put a small handfull of bittony & as much plantin and Spermin and whorehound and a quarter of a handfull of centry and as much cardus one handfull of single pioney roots and a handfull of burdock roots sliced 2 ounces & a half of harts horne an ounce and a half of sweet fennell seeds bruised 3 quarters of an ounce of bastorium and half an ounce of Assifetita.
and one nutmeg sliced stop this pot very close that no breath may come out and on the cover set a weight of 18 or 20 pounds keep this to a moderate heat 8 hours more then let it stand close stopp till the next day then open it & strain it out and put therein a pint and a half of malligo Sack & half a pint of annyseed water & a lb. or more of jeans treacle put it up into bottles & feed it wth treacle when you see fit all the herbs must be very dry.

526. For the Yellow Jaundice or Collick in the Stomach or the Consumption, Obstructions in ye Liver Spleen & especially for ye Falling Sickness.

TAKE a peck of garden snails and wash them in a great bowle of beer & then make your chinney very clean and pour half a bushell of charcole & set ym asife and when they are throughly kindled then with a shoule make a great hole in the midst of the fire and pour in your snails & scatter in some of your fire amongst them and so let them rest as long as you hear them make a noise then you must take them out of the fire and pick them out of their shells with a knife and with a coarse cloth pick and wipe all the green froth from them then in a stone mortar bruise them shells and all next take a quart of earth wormes and slit them then scour them with salt then wash them and break them in pieces in a stone mortar then (the pot being very clean uppon which you set your limbeck) put them into it and about 2 handfulls of Angelico to put into the bottom & 2 handfulls of fallendine then put in a quart of rosemery flowers if you please you may put in Egremory of red dock roots, bear foot, the inner rine of barberry roots of woodforrell & bittony of each 2 handfulls of rew half a handfull of Fenegrick & Turmerick of each an ounce of Saffron well Dry'd and beaten to powder the weight of 6 pence then pour into all these 3 gallons
of the strongest Ale you can get cover your pot & let it stand all night in the place where you mean to put fire to it in the morning you must put to them 3 ounces of very good cloves beaten to powder and before you put your fire to it with 6 ounces of good Harts horne you must not stir it after you have put in the Harts horne left it go down to ye bottom then set on the limbeck and make it fast and so receive the water by pints the first water is best and strongest & must be received by its Selfe ye last is smallest and may be mended by putting the strongest to it when it is used this water must be given to the patient in a morning who must fast 2 hours after it and not sleep upon it or it may be given 2 hours after each meal he or she must take 2 spoonfulls of the strongest with 4 spoonfulls of Ale or white wine and when you give ye smallest you must give as much water as drink. This has been aproved & is an excellent cordial.

527. An Oyle for any deep wound or wounds through the Body or wounds made with an envenomed Weapon, or Sinews Prickt.

TAKE white wine or rather so much brown bastard, one quart of oyle of olives 2 quarts, one quart of the oyle of turpentine put all these together in a great double glafs and with them of ye leaves flowers Hieperig on and seeds of St Johnswort of each 2 great handfuls gently bruised set the glafs in the sun clofe stopt 8 or 10 days then Boyle them in a kettle with straw at the bottom for ye glafs to stand upon and when it hath gently Boyled a great while then take off the kettle and coole it by degrees and then take out the glafs and strain out all the moisture from the herbs and put it into the glafs again with 2 of the fresh leaves of St Johnswort and of the flowers & seeds of each two handfuls & then set them in the sun as before 8 or 10 days then Boyle and strain them
as before & so have you a oyle for all the purposes beforementioned & every year let it be again clarified in ye sun.

528. The Countess of Brifkolls Black Salve.

TAKE one pound of white lead as much Lietheriegie of gold finely beaten & search'd into a quart of fallet oyle then take 4 ounces of yellow wax & 3 drams of camphire boyle them together on a good fire till they grow very black and 6 hours after this is an exceeding good skining Salve. Probatum Est.

529. An Ointment to cure old Sores, to search Fistolas, to eate Dead Flesh and to dry up Wattery Humors.

TAKE verdigreefe 5 drams Honey 14 drams, white wine vinegar 5 drams boyle them on a soft fire and stir them well together till it come to a red substance & so keep it for use. Probatu Est.

530. To make Milke Punch.

TAKE 5 quarts of Brandy 8 quarts of water and two of new milke, four dozen of lemons, three nutmegs, a pound and half of double refin'd fugar, pare one dozen of the lemons very thin leaving none of the white, infuse the parings in some of the brandy about three hours with the nutmegs grated, disolve the fugar in water before you putt it to the brandy, squeeze in the lemons and let all the ingredients be mixt together, then put them all into a bag of thick flannel & let it run without stirring, let about a quart run out, then put it into the bag againe, so repeat it till it is fine.

531. For the Farcy in a Horse.

TAKE three ounces of Sal Tartar, one ounce of lapis Calaminary, one ounce of Putty pulveriz'd; boyl two quarts of stale pifs, one quart of Ale, one
handfull of Rue till it comes to one quart, then give it the horse fasting; if you finde the horse very sick in taking it, you may the next time abate a small matter of the quantity, by this twice repeated I have cur'd an inveterate Farcy; but let him rest three or four daies between.

532. To cure the Grease in a Horse.

TAKE three quarters of a pound of Rozin, two ounces of Sal Prunella, two ounces of stone Brimstone all in fine powders; boyle three pints of brine & three pints of stale Urine till it comes to three pints in the hole, strain it thro a woollen bag, and when tis cold stir in the same powders and give it the horse fasting, and in two hours time give him corne and as much warme water with a little bran in it, as he will drinke, give him exercife as soon as he has taken the drink, and every time you give him water; Note your liquor must be very cold before you mix your powders with it: give him three Drinks resting about four daies between, and the whole quantity in each Drink;

The Oyntment if the Horse be very sore:
Take two ounces of the best Aloes and two ounces of spirits of Wine made into a salve over the fire.

GLOSSARY

Avens. Geum Urbanum. Herb Bennet. Flower Yellow. Perennial. Roots scented like cloves, sudorific, tonic, antipodagric stomachic. When young the roots give a pleasant flavour to ale. They are said to be useful in diarrhœa.

Bole Armeniack. Armenian Bole. Several minerals were formerly used in medicine under this name. The Armenian Bole of the present day is usually made by mixing pipe-clay or common chalk with oxide of iron or red ochre.

Cardus. Cardunus is probably this herb, and there is a great variety. It is evidently one of the Thistles, or the Artichoke.

Crab's Eyes, or Crafish Eyes. Concretions found in the stomach of the river Crawfish. They are white, and resemble in appearance miniature mushrooms. They vary in size from a quarter to five-eighths of an inch in diameter. Formerly used as absorbents and antacids. Only to be found to-day in Museums. Prepared chalk used instead.

Dyascordirum. Diafcordium. An electuary which was formerly in high repute as an antifeptilential. The Swedish Pharmacopeia of 1845 had a formula for this, and the principal ingredient was Herb of Water Germander (Teucrium Scordium).

Egremony. This evidently must be Agrimony. Agrimonia Eupatoria. Flower yellow. Perennial. Herb used in gargles, also as tea. Celebrated as a vermifuge.

Fair Water. The Oxford English Dictionary, edited by Dr. J. A. H. Murray, defines fair water as “clean, pure.”

Flowers of Tussica. Can this be Coltsfoot? Tussilago Farfara. Used still as an expectorant in coughs.

Gallbanum, plaisters of. A plaister made of Gum Gallbanum, Lead Plaister, Turpentine, and Frankincense, nearly but not quite obsolete. Still used in some country districts. The formula was published in the London Pharmacopeia of 1851.

Isope Water. Hyssop Water.

204
Lapis Calaminary. Lapis Calaminaris. Calamine. A native impure carbonate of zinc. Largely used in lotions for all skin diseases. Nearly all the old cooling lotions for the face contained this ingredient, generally with rose water and glycerine.

Litharzie of Gold. A name for Protoxide of Lead. Litharze, the basis of lead plasters.

Melilot. Melilotus Officinalis. Yellow Melilot. Herb pectoral, discursive, causes the peculiar flavour of the Schabziger or scraped cheese of Germany. Decoction emolient. Still used in country places in plasters, but dying out.

Methridate. Methridate or Damocrates Confection. An example of Poly-Pharmacy, it contained between 40 and 50 ingredients, and was supposed to contain the antidote to every known poison. The formula was included in the London Pharmacopeia of 1746.

Mirobalence. Myrobalanus bekerica. Fruit dried and used as an astringent. Used in India, but not much in this country, except as a substitute for Galls in ink manufacture.

Muskadine. Muscardine. A fungus which grows on silk worms, or Muscadine, which was a rich spiced wine.

Oyle of Benn. Oil of Ben. An oil obtained from the seeds of Moringa Aptera (Egypt and East India), used in perfumery and by watchmakers, as it does not readily freeze.

Seynac. Probably meant for Senna. Leaves a very well-known purgative.

Sneezing Powder Root. This is either Achillea Ageratum, Sweet Maudlin, or Ptarmica Vulgaris. Achillea Ptarmica Sneezewort.

Spermint. Mentha Viridis. Spearmint. The ordinary garden mint. The oil used in medicine.

Spirits Diambra. Spirits of Diambar. The name of a stomachic and cordial, which consisted of Amber, Musk, various aromatics, and other ingredients.

Storax. Styrax Officinale. A fragrant resinous balsam obtained from the tree by incision. A close relative of Gum Benzoin, and is with it an ingredient of Friar’s Balsam.

Tormentil. Potentilla Tormentilla. Sept-foil. Root very astringent, febrifuge, and not stimulant. Recommended in some cases of diarrhoea.
BIBLIOGRAPHY

A LIST OF HERBALS

THE GRETE HERBALL, which giveth parfyt knowledge and understanding of all manner of herbes, and their gracious vertues. Lond., 1516. Fol. Lowndes gives the following dates: Printed by Peter Treveris, 1525, 1526, 1529; Laurens Andrewe, 1527; Thomas Gybson, 1539; John Kynge, 1561.
